Flannel Blankets, also known as micro fibre blankets are super soft, light weight and plush in nature. The nature of the product is such that it can be used in various climatic conditions as well as throughout the year. Flannel Blankets are rightly fit as summer blankets and are very much suitable for tropical climates as well as countries with mild winter through out the year.

The multipurpose usage of "Flannel Blankets" has generated a good demand of this product and is widely used all over the world.

The product is offered in different colours / patterns and printed designs, which can be made as per the requirements of customers.
